Frequently Asked Question

Question:	How to install Copy Unit Manager for a non en operating system	glish Author	Yaskawa	
Product:	All 1000 series drives, PC software "Copy Unit ager"	Man- Date	6-Jul-2011	
Keywords:	Global differences, character set	Pages	1 of 5	
Distribu- tion:	Internal Use only Customer			

The PC software Copy Unit Manager can be used to save and load multiple parameter sets which were created by reading drive parameters with the Yaskawa Copy Unit (JVOP181).

When using operating systems with a non english regional setting, it is possible that the PC can not display the text, shown by the installation program correctly.

In case that your PC shows undefined symbols or asian characters after double clicking "setup.exe", follow the instructions below. The instructions are illustrated with screenshots from an english language windows system but the same will work when using Windows in your own native language.

Note: For installing, you must use a user account with administration privileges. A standard user account is not sufficient. When having problems with the installation, please contact the responsible person for computer systems in your company.

Installation instructions for Windows XP

• Click "Start" and select "Control Panel"

Figure 1: Open Control Panel

Seite 2 von 5 06.07.2011

Double click "Regional and Language Options"

Figure 2: Open Regional Settings

• On top of the new windows, select "Advanced"

Regional and Language Options 🛛 🛛 🛛 🔀				
Regional Options Languages Advanced				
Language for non-Unicode programs				
This system setting enables non-Unicode programs to display menus and dialogs in their native language. It does not affect Unicode programs, but it does apply to all users of this computer.				
Select a language to match the language version of the non-Unicode programs you want to use:				
English (United Kingdom)				
Code page conversion tables ✓ 10000 (MAC - Roman) ✓ 10001 (MAC - Japanese) ✓ 10002 (MAC - Traditional Chinese Big5) ✓ 10003 (MAC - Korean) ✓ 10004 (MAC - Arabic) ✓ 10005 (MAC - Hebrew)				
Default user account settings Apply all settings to the current user account and to the default user profile				
OK Cancel Apply				

Figure 3: Regional Options

 Now, the upper section of the window is described with "Language for non-Unicode programs (or the corresponding text in your language). It includes a selection box which is set to the standard language for your country (e. g. "Italian (Italy)" will be shown in Italy).

Change this to "English (United Kingdom)"

- Click "OK".
- The PC will ask if you want to allow the system to restart Windows. Save all your work if any programs are opened and click "Yes".
